1. BIGGEST success tip. Videos MUST be data driven. I ALWAYS consult **VidIQ** prior to creating videos to see video topics, keyword tags and video titles. It's not emotional. It's data. Click [HERE for VidIQ](#).
 - a. Research what people are looking for vs what you think they are looking for.
2. Video Length – needs to be at least 10 minutes for video length to crack Algorithm. During that 10+ minutes, energy needs to be higher energy than usual.
3. Engagement – build a relationship. Reply to all comments, give hearts and make a community!
4. Every video needs to have viewers sign up for your email list with a freebie. I use [ConvertKit](#) to make my life easier for my freebies, email collection and email distribution. Click [HERE for ConvertKit](#).
5. Make an intro and an outro animated. Use [Fiverr](#). Click [HERE](#). Format example – intro for 15-30 seconds, animation intro and introduction of video, like, subscribe and email list. To close video, like, subscribe, email list and animation outro.
6. Say like, subscribe and email list at beginning, middle and end. Always. If you have a relationship from engaging with viewers, this is not a problem to say and ask.
7. Make thumbnails excellent! Visually so important. Use [Canva](#).
